

Tanawat Limungkura

AI Engineer | Java · Python · LLM · RAG · AWS Serverless

tanawatl.cs@gmail.com

1/207 Diamondville, Daothong Rd, Salaya, Phuttamonthon, Nakornpathom 73170, 092-686-3599

TECHNICAL SKILLS

AI & LLM

- Generative AI
- RAG
- LangChain
- LlamaIndex
- OpenAI API
- Vector Databases
- Hugging Face

Cloud & DevOps

- AWS Serverless
- Lambda, S3, EC2
- Docker
- CI/CD Pipelines

Languages

- Java
- Python
- JavaScript

System Design

- Distributed Systems
- Microservices
- API Design
- Data Mining
- Machine Learning

SOFT SKILLS

- Analytical Thinking & Problem Solving
- Adaptability & Continuous Learning
- Technical Communication
- Ownership & Accountability
- Communicable in English, both writing and speaking

EDUCATION

M.Sc. Computer Science

Chulalongkorn University

2015 – 2018 | GPA 3.75

B.Sc. Computer Science

Major: Software Engineering

SIIT, Thammasat University

2004 – 2008 | GPA 3.20

PROFESSIONAL SUMMARY

Software Engineer with expertise in AI architecture, driving AI integration for organizations. Specialized in Generative AI, LLM models, and RAG frameworks with a strong background in cloud infrastructure and scalable system design.

WORK EXPERIENCE

AI Developer — AI Gen Co., Ltd.

Specialist in Generative AI & RAG | 2024 – 2025

- Designed and deployed RAG system with LangChain for organization data integration.
- Developed image creation and editing system based on Stable Diffusion architecture.
- Built production-grade Smart Chatbot using Generative AI with high accuracy.
- Optimized Vector Databases (ChromaDB, Milvus): improved retrieval speed ~20% and system robustness ~30% under peak traffic.
- Designed and maintained Core System on AWS with Serverless architecture, reducing inference latency by ~20%.

Senior Developer — Yip In Tsoi Co., Ltd.

2019 – 2023

- 2023: Led DevOps & scalability initiatives — architected CI/CD pipelines and enhanced enterprise-grade production systems.
- 2022: Designed backend and Data Pipeline for Big Data processing with performance tuning using optimal tech stacks.
- 2019–2021: Developed APIs and application modules using Java, Python, and Git.

System Engineer — IBM

2011 – 2015

- Administered and designed Windows Server environments for enterprise clients.
- Ensured server availability and maintenance compliance with SLA agreements.
